

HANDS-FREE PHONE KIT

Visteon's Hands-Free Phone Kit helps people drive with more comfort and convenience. Using Bluetooth® wireless technology, it links cell phone functions to the vehicle. The cell phone's visual display is replaced by an easy-to-see LCD console on the dash, and the sound is routed through the vehicle's audio system. Voice recognition and a number of other advanced calling features are also added. The kit includes:

- **CONSOLE** – Compact unit mounts easily on the dash and features a user-friendly LCD graphic display
- **CONTROL BOX** – The box is the electronic heart of the system and mounts under the dash
- **MICROPHONE** – Mounts above the rear view mirror to pick up driver or passenger voices

- **POWER & AUDIO WIRING** – For power, microphone and audio/mute connections
- **MOUNTING ACCESSORIES** – For the microphone and console

The Hands-Free Phone Kit offers complete keypad, sound and vision user interface similar to fully integrated OE phones. It's a quality product with a multitude of features that make mobile phone use far easier.

The kit has universal applications and works with most Bluetooth-enabled brands of cell phones, and integrates with most vehicle audio systems using ISO connectors. Installation can be handled by a vehicle dealer or any professional vehicle electronic accessories dealer.

The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Visteon Corporation is under license. Other trademarks and trade names are those of their respective owners.

FEATURES & BENEFITS

Features	Benefits
Console Keypad	Easy-to-see pick-up and hang-up buttons plus dial for scrolling modes and volume control
Visual Interface	LCD console screen that displays phone menu plus additional modes such as phonebook synchronization, specialized dialing, caller ID, connection priority and more
Audio Interface	Quality sound via condenser microphone and vehicle audio system – including dynamic background/road noise adaptation, automatic radio mute and private conversation mode
Voice Recognition	Real-time voice recognition dialing of up to 200 stored names (for most newer cell phones) with 99.1% recognition rate on isolated words
Customizable Modes	Multi-user for up to three phones; dual call; autoconnect on incoming calls; main and secondary users; wordspotting (some modes may require software upgrade)
Warranty	Covered by a 3-year/36,000-mile limited warranty when installed by an authorized technician on a new vehicle
